DETAILED ACTION

This office action is in response to the amendment and remarks filed 1/6/05. Since the examiner has applied new grounds of rejection, this office action is being made non-final to afford the applicant the opportunity to respond to the new grounds of rejection.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "1.5-4D" in line 2. There is insufficient antecedent basis for this limitation in the claim. The recitation "a diameter D" was first positively recited in claim 4, however, claim 6 does not depend from claim 4 but from claim 1 (which does not recite the limitation a diameter D). Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by **Vogt** (US 4,236,378).

Art Unit: 3746

of said combustor liner 42, each groove G having a uniform cross-section and extending continuously about a circumference of said liner. See particularly **Figures 2, 4, 5 and 6** of Vogt.

With respect to claim 3, **Vogt** teaches that said grooves G are arranged transversely to a direction of a cooling air flow. See particularly **Figures 2, 4, 5 and 6** of Vogt.

With respect to claim 6, **Vogt** teaches that a center-to-center distance between adjacent grooves is equal to $1.5-4D$. See particularly **Figure 2** of Vogt above.

Allowable Subject Matter

5. Claims 9-16 are allowed.

6. Claims 2, 4, 5 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 3 and 6 have been considered but are moot in view of the new ground(s) of rejection. See rejection above.
